Crypto Deposit

Finding Balances and Deposit Address

Goto Finance Page

In Filter the coin you need to deposit and then Click on Deposit Button

You will notice address for the crypto deposit.

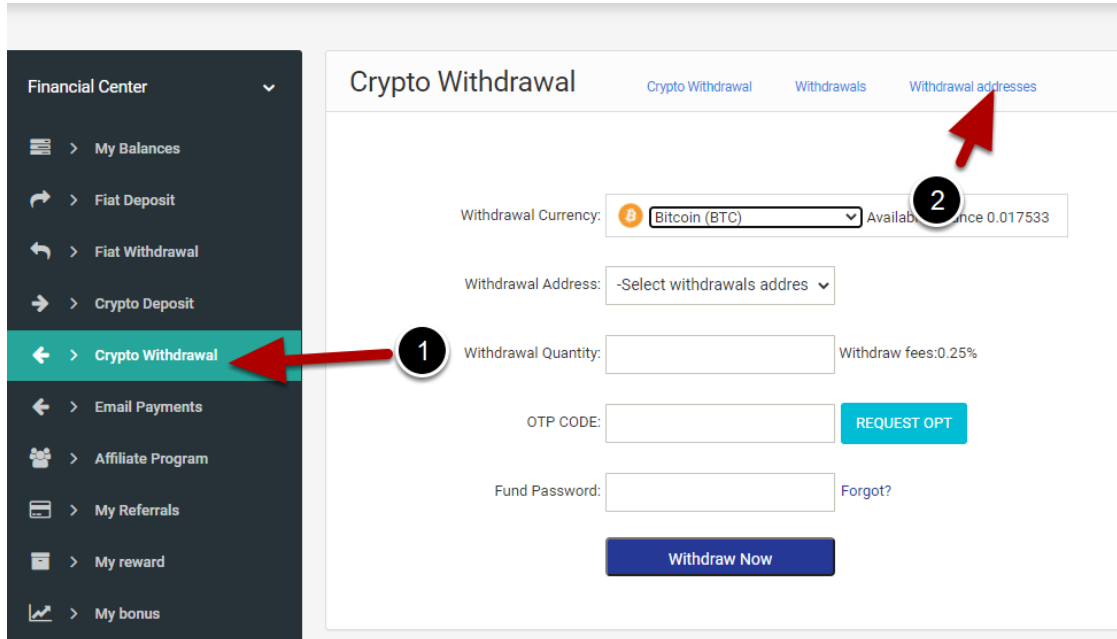

You can either copy this address or directly scan this QR code to deposit on this address.

Deposits are automatic and gets credited on your account.

You can come bank on same page to see , your deposit history.

Crypto Withdrawal

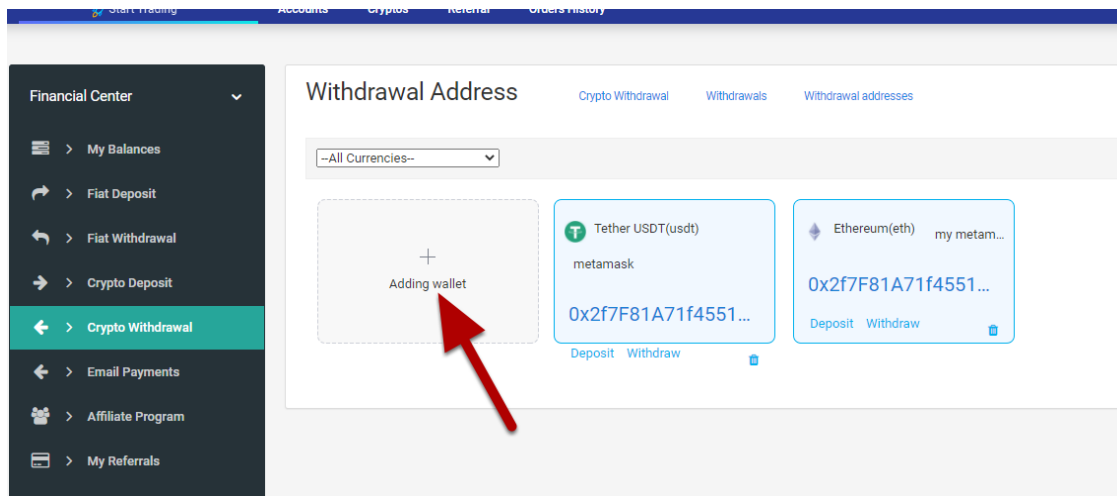

Saving Withdrawal Address

The screenshot shows the 'Crypto Withdrawal' page. On the left is a 'Financial Center' sidebar with a menu. The 'Crypto Withdrawal' option is highlighted with a red arrow and a circled '1'. At the top right of the main content area, there are three tabs: 'Crypto Withdrawal', 'Withdrawals', and 'Withdrawal addresses'. A red arrow points to the 'Withdrawal addresses' tab, which is also marked with a circled '2'. The main form contains the following fields and buttons:

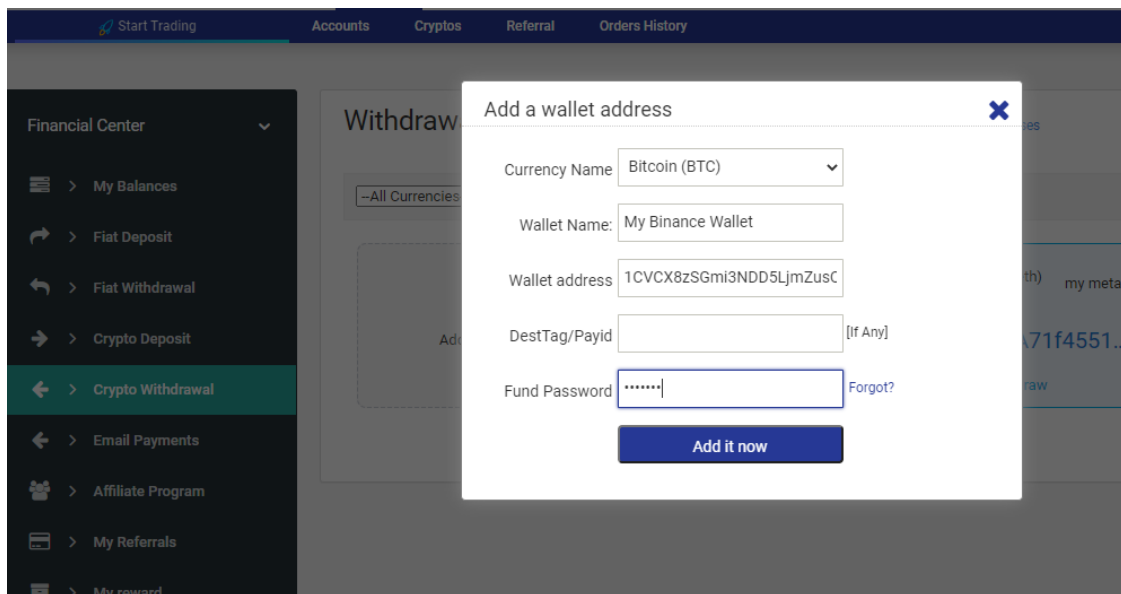

- Withdrawal Currency:** A dropdown menu showing 'Bitcoin (BTC)' with an available balance of 0.017533.
- Withdrawal Address:** A dropdown menu with the placeholder text '-Select withdrawals address'.
- Withdrawal Quantity:** An input field.
- Withdraw fees:** Displayed as 0.25%.
- OTP CODE:** An input field next to a 'REQUEST OPT' button.
- Fund Password:** An input field next to a 'Forgot?' link.
- Withdraw Now:** A large blue button at the bottom.

Goto Finance > Crypto Withdrawal > Withdrawal Addresses

The screenshot shows the 'Withdrawal Address' page. The left sidebar is identical to the previous screenshot, with 'Crypto Withdrawal' highlighted. The main content area has a title 'Withdrawal Address' and three tabs: 'Crypto Withdrawal', 'Withdrawals', and 'Withdrawal addresses'. Below the tabs is a dropdown menu for 'All Currencies'. The main area displays a list of saved withdrawal addresses:

- A dashed box with a '+' icon and the text 'Adding wallet' is highlighted with a red arrow.
- A card for 'Tether USDT(usdt)' from 'metamask' with the address '0x2f7F81A71f4551...' and buttons for 'Deposit' and 'Withdraw'.
- A card for 'Ethereum(eth)' from 'my metam...' with the address '0x2f7F81A71f4551...' and buttons for 'Deposit' and 'Withdraw'.

Fill in your details

Currency Name: Choose coin your need to withdraw

Wallet name: Aname to identify address [For your self]

WalletAddress : Address where you would need to withdraw the funds

DestTag/Payid:This is optional and required only for few coins like , XRP/XMR etc

Fund password: It is your fund password [Not the password]

And click on **Add it now**

Withdrawing to previously saved wallet address

The screenshot shows the 'Crypto Withdrawal' interface. On the left is a dark sidebar menu with options: 'My Center', 'My Balances', 'Fiat Deposit', 'Fiat Withdrawal', 'Crypto Deposit', 'Crypto Withdrawal' (highlighted with a red arrow), 'Email Payments', 'Affiliate Program', 'My Referrals', and 'My reward'. The main content area is titled 'Crypto Withdrawal' and has three tabs: 'Crypto Withdrawal', 'Withdrawals', and 'Withdrawal addresses'. The form includes the following fields:

- Withdrawal Currency:** A dropdown menu showing 'Bitcoin (BTC)' with a Bitcoin icon. A red arrow points to this dropdown. To its right, it says 'Available Balance 0.017533'.
- Withdrawal Address:** A dropdown menu showing 'My Binance Wallet'. Below it, a list of options is visible: '-Select withdrawals address-', 'My Binance Wallet' (highlighted in blue), and '+ Add New Address'.
- Withdrawal Quantity:** An input field.
- Withdraw fees:** Displayed as '0.25%'.
- OTP CODE:** An input field containing 'TA873483' and a 'REQUEST OPT' button.
- Fund Password:** An input field with masked characters '.....' and a 'Forgot?' link.
- Withdraw Now:** A large blue button at the bottom.

Finance> Crypto Withdrawal

Choose our

1. Withdrawal currency
2. Withdrawal Address [Previously saved]
3. Enter amount you need to withdraw
4. Click on request OTP, This will send your unique withdrawal OTP on your email address
5. Enter OTP Code
6. Enter Funding Password
7. Click on Withdraw now

Your withdrawal request will be auto processed or will be sent for approval to team.

Fill in ID Number

and Upload all images step by step.

Google 2FA

Google 2FA setup for security

My Account

- Account
- KYC
- Login password
- Fund Password
- Mobile
- My Logs
- Shipping address
- Google 2FA**

2FA Setup

1st step: Install Google Authenticator on your smartphone.

Download iOS Version [Apple Store](#)

Download Android Version [Play Store](#)

3rd step: Enter 6-digits code from Google authenticator:

Two-factor authentication password:

2FA Module Config: ☒ Sign in ☒ Funds out

[Verify and enable](#)

2nd step: Setup "Google Authenticator".

In the Google Authenticator, Click + to add new account. You may scan the QR code or enter provided key to add your account on Google Authenticator

Save this Key

If you can not successfully scan bar code on the map, you can also manually add accounts, and enter the following key: **H7RPIPL2GZDRA6WY**

Goto User Account> Google 2FA

You would see 2 links 1st for iOS and 2nd for Google

Download Google 2FA app [Or Authy app]

In Step 2 Scan right side code , also note down this backup key

After scanning the key , You would be see 6 digit code valid for 30 secs Enter it in 2 FAcodes on this interface and click on Verify and Enable

Other Parts

The screenshot shows a user's account management interface. On the left is a sidebar titled 'My Account' with a dropdown arrow. It contains eight menu items, each with an icon and a right-pointing chevron, numbered 1 through 8 in black circles: 1. Account (person icon), 2. KYC (ID card icon), 3. Login password (lock icon), 4. Fund Password (key icon), 5. Mobile (phone icon), 6. My Logs (magnifying glass icon), 7. Shipping address (location pin icon), and 8. Google 2FA (Google G icon). The main content area is titled 'Account' and has a 'View Description' link. It features a header section with a profile card (FULL NAME, green person icon), a KYC status box (Not certified, KYC, blue X icon), and an 'APPLY STATUS' button (blue text, red person icon). Below this is a table with five rows: 'API KEY' (Preview API Keys, PREVIEW API KEY button), 'Login password' (You need to enter login account password, Change Password button), 'Fund Password' (You need to enter a password when entering into a transaction, Change Password button), 'KYC' (And subject to national requirements for the safety of your funds need to be Verified, Complete KYC button), and 'SUBSCRIPTION' (Avail the benefits by subscribing to our plans, SUBSCRIBE NOW button).

Advance Trading

Advance trading works on Orderbook , where it matches with orders of other users .

You can place an order with a price and quantity of your choice and balance.

Use Case:

You have 0.027 btc in your account and want to sell it for usdt.

Current market price is 10480, However if you want to sell it for 11000.

You can place price = 11000 , and click on 100% or enter qty you want to sell.

When bitcoin price on exchange reaches 11000, your order will match and you will receive USDT accordingly.

Similar you can also place Buy order to buy at spetic price.

To trade your coin immedtely you can click on market tab and enter qty . It will immediately buy/sell your coin at best available prices .
